Post-disaster needs assessment of damages and losses: floods in the Lori and Tavush regions

Naira Mandalyan

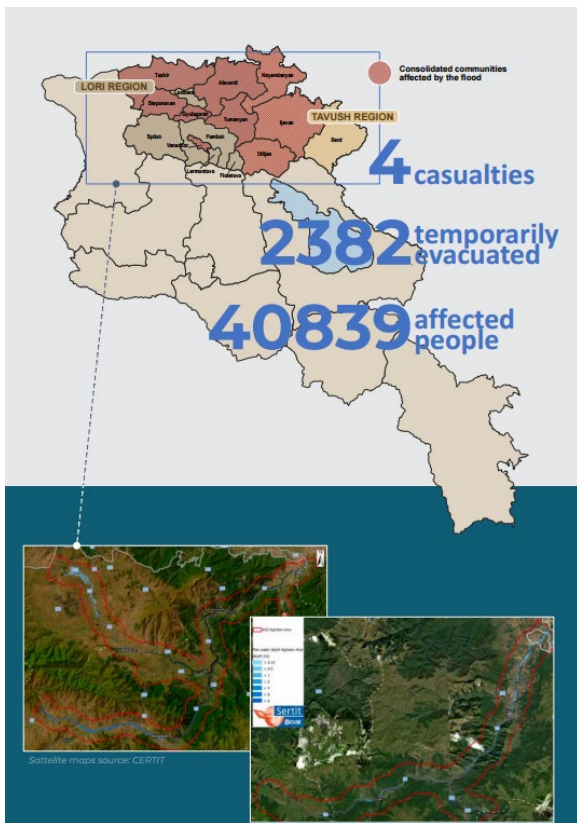

Statistical Committee of Armenia

Lori and Tavush regions, RA - May 26, 2024

The severe flooding affected a total of 12 settlements across the two regions, including the communities of:

- Alaverdi,
- Gyulagarak,
- Pambak,
- Tashir,
- Tumanyan,
- Dilijan,
- Noyemberyan.

Three flood scenarios were observed:

- Flash floods in Alaverdi and Karkop due to mountainous terrain, with water velocities estimated at 3-6 m/sec near Alaverdi and 4-10 m/sec near Akhtala and a significant amount of debris and mud transported by the Debed river. The water lingered for several days.
- Riverine floods in Tashir, with water velocities of 1-3 m/sec³, where the floodwater receded quickly, allowing evacuees to return to their homes the next day.
- Pluvial floods in Amrakits caused by excessive rainfall.

Damages and Losses

Working groups were formed in order to carry out a post-disaster needs assessment (based on the PDNA methodology) in the declared disaster zones due to the floods that occurred on May 26, 2024 in the Lori and Tavush regions of the Republic of Armenia.

Representatives of Armstat are involved in the working groups of all sectors.

PDNA Armenia Sector Report Outline

1. Pre-disaster baseline information/ Sector Overview
2. Assessment (estimation of the value) of disaster effects
3. Assessment of disaster impact
4. The sector recovery strategy
 - 4.1 Sector Recovery Vision
 - 4.2 Reconstruction and Recovery Needs, including Build Back Better
 - 4.3 The Sector Recovery Plan
 - 4.4 The Sector Recovery Needs costing
 - 4.5. Implementation Arrangements

Sectors	Lead Ministry
Housing	Ministry of Territorial Administration and Infrastructure
Business (commerce, industry and tourism)	Ministry of Economy
Agriculture	Ministry of Economy
Transport	Ministry of Territorial Administration and Infrastructure
Community Infrastructure	Ministry of Territorial Administration and Infrastructure
• Water, Energy	Ministry of Territorial Administration and Infrastructure
• Health	Ministry of Health
• Education	Ministry of Education, Science, Culture and Sport
Macroeconomics	Ministry of Finance
Human Impact and Livelihoods	Ministry of Labour and Social Affairs
Gender	Ministry of Labour and Social Affairs
Disaster Risk Reduction	Ministry of Internal Affairs
Environment (and waste management)	Ministry of Environment

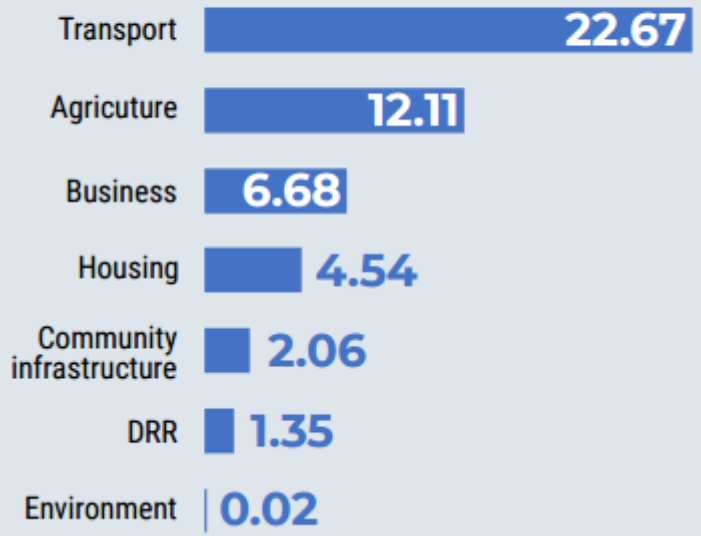

Total damage and loss by sector and sub-sector (in USD millions)

Sector	Damage	Loss
Social Sectors		
Housing	4.54	0.27
Productive Sectors		
Agriculture	12.11	7.03
Business	6.68	3.39
Infrastructure Sectors		
Transport	22.67	10.35
Community infrastructure	2.06	0.87

Total recovery needs by sub-sector (in USD millions and percentage share)

Business Sector

Armenia's economy has made significant progress in recent years, with an 8.7% economic growth recorded in 2023. The GDP per capita reached 8,168 USD, while foreign trade increased by 46%, amounting to 20.7 billion USD. The business sector, spread across services, industry, and agriculture, plays a pivotal role in this growth, with Lori and Tavush regions contributing to national development through key industries (Armstat)

UNDP contacted 35% of the listed businesses via email and follow-up phone calls to gather comprehensive and reliable data on the types of enterprises and the extent of the damages. Based on the available data and necessary assumptions made, the damages caused by the May 25-26 flood in 9 communities of Lori and Tavush regions of Armenia to business property, equipment and merchandise were estimated at 6.3 million USD. The damage and loss were estimated at 3.4 million USD and the recovery needs were estimated at 11.2 million USD.

Building stock and population in Alaverdi, Tashir and Noyemberyan urban areas (source: Armstat)

	Total		Multi-family buildings		Single-family homes		Population
	Number of apart.	Total floor area, m ²	Number of apart.	Total floor area m ²	Number of apart.	Total floor area m ²	
Alaverdi	7,183	490,741	5,563	306,936	1,620	183,805	15,300
Tashir	3,312	521,625	1,114	55,205	2,198	466,420	7,600

Affected dwellings (number and flooded or damaged floor area) per building type

Housing sector: Reconstruction and Recovery Needs

Key recovery needs include:

- Temporary accommodations, debris removal, and replacement of essential household goods.
- Securing funds for reconstruction, developing a post-event damage assessment methodology, implementing an Early Warning system, improving land use planning, managing illegal buildings, and raising community awareness on flood risk.
- Preparing flood hazard maps integrated with landslide and seismic risk assessments.

These needs align with Armenia's Disaster Risk Reduction strategy.

Disaster Risk Reduction Sector: Reconstruction and Recovery Needs

- Enhancement of early warning systems,
 - Automatic weather stations,
 - Hydrological observation stations,
 - Water current meter set,
 - Radio-location systems,
 - Retaining walls.
-
- Development of GIS-based Risk Index,
 - Multi-hazard risk modeling,
 - Strengthening Regional and National Crisis Management Centers,
 - Promoting risk mitigation and evidence based decision-making,
 - Strengthening hydrological forecasting, seasonal forecasts based on remote-sensing data, and snow modeling.
 - Improving weather forecasting, and numerical weather prediction system,
 - DRM planning for health facilities and implementing Hospital Safety indexing,
 - Developing a unified PDNA baseline data and providing related training.
