Delivering Climate Resilient Development Policies in Africa (2019 - 2023)

*Lessons learned from the
inception phase*

Lessons learned from the inception phase

Delayed inception workshop to align inception phase activities & agree with partners modalities for the project implementation due to:

- Inability to get a common agreed date by key partners due to conflicting calendar;
- Time taken to explain project alignment with missions of other institutions invited join multi-stakeholders advisory group (MSAG);
- The necessity of early CCDA conference to gather regional inputs into the UN;
- Climate Action Summit and the COP25.

Lessons learned from the inception phase

COVID-19 disruption of implementation plan owing to:

- Countries lockdown and suspension of air-travel;
- Inability to convene face to face dialogues/workshops;
- Closure of offices and scale down of full time staff;
- Internet connectivity challenges;
- Virtual meetings disruptions.

Way forward

- Enhanced partner coordination modalities;
- Options for effective implementation of activity under COVID- 19 constraints.

THANK YOU!
