Titre de la conférence	RE, a true social leverage (case study: agriculture in the Ouarzazate region)
Thématique¹	<i>RE, a shared development</i>
Contexte	<p>In line with its local-development strategy, Masen acts as a development driver in the areas where its projects are implemented, ensuring complementarity with other local efforts undertaken by public, private, or civil-society actors.</p> <p>Masen has developed a pilot project for the rural commune of Ghassate, aiming to sustainably improve agricultural performance in the area, in such a way as to ensure food security for the local population and provide support for a successful adaptation to climate change.</p> <p>Indeed, given its many weaknesses, the agricultural sector has been the focus of a meticulous analysis to identify lingering constraints and locate priority sites and intervention areas. The gender aspect has been taken into account both in the diagnosis and in the action-plan proposal.</p> <p>This side event will present the diagnostic approach applied in the intervention area, the conclusions of the diagnosis, and the ensuing action plan. Accounts will be shared to highlight some of the already accomplished success stories.</p>
